## PROFESSIONAL SUMMARY

Software Engineer and a recent BS IT graduate (2026) with 1.5 years of experience delivering full-stack web and mobile applications for real clients. Built an AI-powered web vulnerability scanner, a live MERN e-commerce platform and an AI fraud-checked donation platform. Skilled in Python, Node.js, React and web security.

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript (ES6+), TypeScript, C#, SQL, Dart
**Backend and Databases:** FastAPI, Flask, Node.js, Express.js, ASP.NET, REST APIs; PostgreSQL, MongoDB, SQL Server, MySQL
**Web, Mobile and AI:** React.js, Next.js, Flutter, Groq, OpenAI, LangChain
**Tools and Cloud:** Git, GitHub, Docker, Vercel, Render, AWS (Cloud Practitioner Essentials)

## PROFESSIONAL EXPERIENCE

**Full Stack Engineer Intern** | SafeX Solutions (Hybrid) *Jul 2026 to Sep 2026*

- Completed the Skills Development Internship Program in Full Stack Development, building with React.js.
- Worked directly with clients across requirement gathering, implementation, testing and deployment.

**Full Stack Engineer (Contract)** | Business Incubation Center (BIC), On-site *2025 to 2026*

- Built and deployed MERN web and Flutter mobile applications for external clients (React.js, Node.js/Express.js REST APIs, MongoDB).
- Turned client requirements and wireframes into responsive components, supporting testing, debugging and deployment.

## KEY PROJECTS

**WebXGuard: AI-Powered Web Vulnerability Detection Platform** *Final Year Project*

*Python, FastAPI, Flask, React.js, PostgreSQL, Playwright, Docker, Groq LLM API*

- Built a scanner detecting 7 vulnerability types (SQL injection, XSS, CSRF, security headers, cookie flaws, misconfiguration, SSL/TLS) and mapped findings to OWASP Top 10, CWE, ISO 27001, PCI DSS, HIPAA and GDPR.
- Developed Playwright crawlers, including authenticated crawling, that capture requests, responses, endpoints, forms, cookies and sessions as scanner input.
- Integrated a Groq LLM to classify severity, score risk and prioritize findings, with AI anomaly detection and predictive risk analysis on scan data.
- Built 6 React.js dashboard views to present scan findings, with PDF report generation across 3 report types.
- Delivered continuous monitoring (scheduled scans, newly introduced vulnerability detection, email alerts) and secure authentication (email verification, JWT, Google and GitHub OAuth).

**Aidbloom: Online Donation Platform with AI Fraud Detection** *Live*

*C#, .NET, SQL Server, Bootstrap, Google OAuth*

- Built a donation platform with email and Google sign-in on a .NET and SQL Server backend, integrating an AI model that confirms a donation only when no fraud is detected.

**NORDVIA EXPORTS: Business Website Development and Digital Presence** *Live*

*Next.js, TypeScript, Tailwind CSS, GSAP, Lenis, Vercel, GitHub CI/CD*

- Developed a responsive website for a Sialkot-based apparel export business, with quote and contact forms on server-side API routes, honeypot spam protection and file upload limits on type, count and size.
- Implemented cookie consent with analytics and marketing off by default, Privacy Policy, Terms and Cookie Policy pages, technical SEO, and automatic deployment on every push.

**ShopSwift: Full-Stack MERN E-Commerce Application** *Live*

*React.js, MongoDB, Express.js, node.js, Tailwind CSS, GSAP, Lenis, Vercel, Render, GitHub CI/CD*

- Developed a full stack e-commerce platform using the MERN stack with responsive and reusable user interfaces.
- Designed and integrated RESTful APIs for efficient product, user, and order management.
- Implemented JWT and OAuth 2.0 authentication and integrated Stripe payment gateway for secure online transactions.

## EDUCATION

**Bachelor of Science in Information Technology** | University of Gujrat, Pakistan *Nov 2022 to Jul 2026*
CGPA: 3.14/4.0

**Intermediate in Computer Science** | Aspire College for Boys, Gujranwala *June 2019 to October 2021*
Marks: 978/1100 (88.91%)

## CERTIFICATION, RESEARCH AND LEADERSHIP

- AWS Cloud Practitioner Essentials, Amazon Web Services Training (2026).
- Co-authored published machine learning research, "Predictive Modeling of Gallstone Risk" (December 2025).
- Served as Vice President of a university society and as Event Manager for university events. Languages: English, Urdu.
